### Professional Summary:

With 7+ years of experience, I am a self-managed professional skilled in managing BI and Analytics projects across diverse industries. I possess valuable insights into businesses and their processes, ensuring seamless project deployment and server administration. My expertise lies in integrating BI solutions with structured databases, enabling data-driven insights. I excel in leading and managing consultant teams, prioritizing projects for timely execution. Proficient in data analysis, I uncover valuable insights for informed decision-making. I specialize in impactful KPI visualization and possess design acumen. I consistently deliver high-quality results, leveraging strong analytical skills and effective communication with stakeholders. Committed to delivering business value, I stay updated with industry trends. I bring a proven track record in managing BI projects, understanding business processes, and employing data analysis and visualization techniques for meaningful outcomes.

### Experience:

#### Sr. Data Engineer – *LTIMindtree*, (July'22 – till date)

- Serve as the primary contact for automation initiatives.
- Develop and implement Distributor Performance Management, including key performance indicators (KPIs) such as Written Premium, Earned Premium, Incurred Loss, and others for major insurance clients.

#### Consultant – *Fractal Analytics* (Aug '20 – July'22)

- Worked for retail domain data, and business analytics functions.
- Operationalized business intelligence solutions and conducted analytics to identify opportunities and strengths to meet business goals.
- Presented and communicated the findings in an understandable and actionable way tailored to the audience and business user's needs.
- Established long-term and value-added relationships with assigned business partners to educate and develop the analytic capability of business customers and the organization.
- Created and maintained data visualizations that educated, informed and engaged business partners on key metrics and performance measures.

#### Senior BI Consultant – *Icon Business Solution*, (June '17–Mar '20)

- Worked with cross-functional clients to structure problems, identify appropriate data sources, extract data, and develop integrated information delivery solutions.
- Played key roles in medium to large BI projects (e.g., Consultant, Analyst & Lead).
- I participated and provided technical leadership in all phases of BI projects, from discovery and planning through implementation and delivery.
- Graphical User Interface development for senior, middle & lower management.
- Performed cleansing, de-duplication, and harmonization of data across various systems.
- Supported the planning and coordination of data governance activities.
- Developed and maintained an enterprise data architecture roadmap to improve the maturity and effectiveness of enterprise data management.

#### IoT Developer (Intern) – *Autonetics Centre*, (Feb '17–June '17)

- Collaborated with the IoT team to develop a smart stick that enhances mobility and obstacle recognition for visually impaired individuals.
- Utilized tools such as Raspberry Pi 3 Model B, Various Sensor, Connectors and Android Phone.
